

I am writing to request that LPFM stations not be allowed to have priority over regional and national stations. I travel often, and K-Love, the station I listen to, offers encouraging music and programming that I would not have access to otherwise. I have tried to listen to some of the local stations, but most do not offer encouraging music and messages. The few other Christian stations in the area do not cover the entire area in which I travel, and they are mostly like talk radio stations, which put me to sleep when I am driving. There have been times in which some local stations have overridden the K-Love signal. When that happens, I may try to find another station for a few minutes, but I usually get disgusted quickly and stop listening to the radio at all. I know other people who travel a lot who like to be able to listen to the same station wherever they travel. Truck drivers are one group of people who fit in this category. Please allow me and people like me to keep listening to national radio. Thank you for your consideration.
